

Simonds/Notting Nova Bender & Dies

Dies Included with Nova Bender:

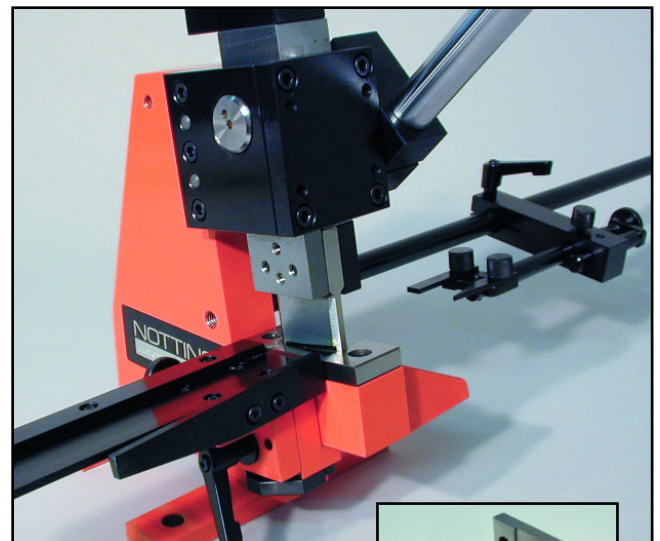

The Nova Bender keeps the rule flat and square with its die support arms allowing for accurate bends. It also features a large working surface and small die set for intricate bends. Raised die post system allows bending up to 2" high, 3 pt. rule, 360° around the die set. Hel mold die adapters are available.

Simonds/Notting Nova Notcher

Replacement Blades are available for both the Nova Notcher and Nova Lipper.

Simonds/Notting Nova Lipper

The Nova Notcher notches any height of rule up to 4 pt. thickness. The round notch design eliminates rule fracturing and subsequent blade wear. Notching blades are available in several sizes as small as 1/8" wide.

The Nova Lipper miters rule left and right up to 1-1/4" high and 4 point thick. The rule lies flat in the Nova Lipper keeping the miter tip from distorting, making for a stronger lip. Quickly adjustable, lips 2 pt. or 3 pt. center or side bevel rule

Both the Nova Notcher and Nova Lipper feature unique handle adjustment for comfort and efficiency.
