

We carry a wide variety of ejection materials, from sponge rubbers to gum rubber strips, to stripping foam to a multitude of ejection materials. Available in sheets, strips and blocks along with special shapes as shown below. Many of our materials can be ordered with Pressure sensitive adhesive (**PSA**).

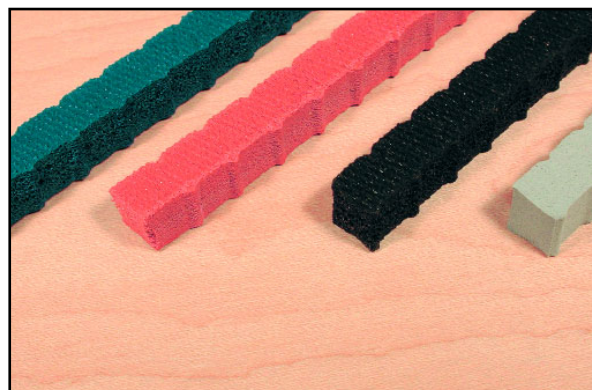

On the sample chart (next page) the numbers assigned to each product denotes the actual durometer firmness reading (i.e. "75 Red" has a durometer reading of 75).

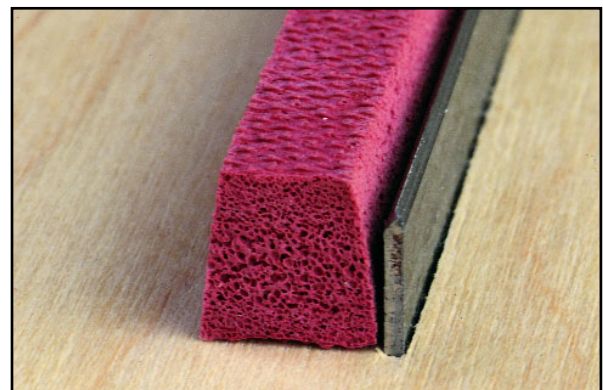

**Di-Wave strips** - allows for easy and quick application, automatically spaces rubber adequately from the steel rule.

**Di-Curve strips** - makes rubbering dies with curved steel rule a snap!

**Di-Point strips** - points allows for correct spacing automatically from the steel rule.

**Di-Taper strips** - specially designed taper automatically keeps the rubber away from the rule during compression.
