All Plastrix matrix feature a polyester film base and strong finger-lift PSA.

12mm Base
XTC Plastrix 12mm

8.75mm Base
Plastrix

5mm Base
Plastrix Mini

CCM's Plastrix is the tough synthetic matrix that offers longer runs and reliable performance, run and after run. Plastrix features a tough PVC body with a film base that maintains crease consistency throughout the run. An improved adhesive assures that Plastrix stays put securely, and precision bonded applicator allows for accurate application to the counter plate. Plastrix also has finger-lift release paper, that makes installation a breeze.

Plastrix features a lower, ultra-smooth profile with a chamfered edge, designed to provide smooth runs at today's faster press speeds. And our wide selection of sizes and 3 base widths, even off-center sizes, means we have the exact Plastrix that's right for your application!

Plastrix is available in 8.75mm and 5mm base
XTC Plastrix 12MM in 12mm base
Three base sizes to choose from!

Call or email for available sizes in all styles, and Off-Center versions too!

CCM Bench Miter Press - This rugged bench miter press can miter two ends of matrix at one time! Reversible cutting anvil for long life. Guides for both 5 mm and 9 mm width matrix.

CCM Matrix Miter Pliers - register an exact mitered cut. Larger blade cuts the finger lift tape. Heavy duty enough to cut the largest metal-based matrix and gentle enough to cut small pieces!

Multi-Cut Pliers - great for cutting any non-metallic matrix, an economic alternative to high cost cutters! Comes with 4 blades, and storage cartridge!
