

CCM's PINK Matrix

C&T CHANNEL CCM

CCM's PINK is durable, has an improved adhesive, and can be sanded or skived!

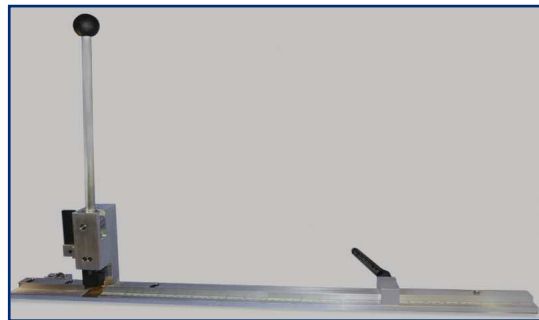

CCM's PINK is the tough, synthetic, fibrous matrix that offers long runs and reliable performance, with the ability to be sanded and skived if desired. PINK features a tough Rosadium® body with a film base that maintains crease consistency throughout the run. Improved bonded applicator ensures precise application, and specialized adhesive makes sure PINK stays put! PINK also has finger-lift release paper, that makes installation quick and easy.

PINK features an ultra-smooth profile with a chamfered edge, designed to provide smooth runs at today's faster press speeds. A wide selection of sizes means we have the exact PINK matrix that's right for your application!

PINK is available in Standard (12mm) width and Slim (5 mm) for multiple creases in close proximity.

CCM Matrix Miter Pliers - register an exact mitered cut. Larger blade cuts the finger lift tape. Heavy duty enough to cut the largest metal-based matrix and gentle enough to cut small pieces!

CCM Bench Miter Press - This rugged bench miter press can miter two ends of matrix at one time! Reversible cutting anvil for long life. Guides for both 5 mm and 9 mm width matrix.

Multi-Cut Pliers - great for cutting any non-metallic matrix, an economic alternative to high cost cutters! Comes with 4 blades, and storage cartridge!

See other side for PINK Size Selection!
